

Revised 29 June 1993.

The Brahmasphutasiddhanta consists of 24 chapters, but this digitalized version contains mathematical chapters only, that is,

1. Chapter 12 (ganita),
2. Chapter 18 (kuttaka),
3. Chapter 19 (sanku-chaya-vijnana),
4. Chapter 20 (chandas-citi-uttara), and
5. jna-prakarana (stanzas 17--23) of Chapter 21 (gola).

Notation (local rules)

[D: x > y] indicates that Dvivedin, the editor, suggests the reading, y, instead of x.

In Chapter 18:

[Cb.n] indicates that the stanza is given the number, n, in Colebrooke's translation.

[Cb.@] indicates that the stanza does not exist in Colebrooke's translation.

Otherwise, the stanza number coincides with Colebrooke's one.

(Colebrooke's translation is available for Chapters 12 and 18 only. In Chapter 12, all the stanza numbers given by Dvivedin coincide with Colebrooke's.)

As Chapter 20, on combinatrics concerning Sanskrit prosody, has not been deciphered yet, the text of that chapter is left exactly as it is in Dvivedin's edition without decomposition of compounds and sandhi.

Revisions:

- 2020-07-31: TEI encoding by mass conversion of GRETIL's Sanskrit corpus
